**FEIN. Unverwüstliche
Elektrowerkzeuge.**

The world's most powerful renovation system.

FEIN SUPERCUT CONSTRUCTION.

**New sets and
new accessories**

Save time and money – with the FEIN SUPERCUT CONSTRUCTION.

Powerful motor, high-quality materials, outstanding ergonomics – the FEIN SUPERCUT CONSTRUCTION is the most powerful system for interior and renovation applications. It's fast, strong, versatile and, of course, durable. It allows you to work up to 350% faster, even in tough continuous use in heavy-duty sawing applications, which is hardly surprising, as the new FEIN SUPERCUT embodies more than 40 years of experience in developing durable oscillators for industry and manual trades.

You will find new accessories on page 21 onwards.

The right set for every professional.

FEIN's expertise has resulted in the development of an outstanding range of accessories which allow users to perform all the important special applications in most trades as well as a multitude of general construction applications. The FEIN SUPERCUT CONSTRUCTION and the industry-specific accessory sets give professional tradespeople everything they need to achieve the best results in minimum time in tasks which previously required time-consuming manual labour.

FEIN professional set for interior work with wood Page 8-9

The extensive range of E-CUT saw blades for wood, plastic, plasterboard and metal make the set the powerful system for fast and precise sawing work in interior and renovation applications.

FEIN professional set for repairing/replacing windows Page 10-11

With its special range of accessories, this is perfectly suited to fast, simple and neat renovation of putty-mounted insulation windows and replacing old windows. It also cuts working time by up to 80%.

FEIN professional set for tile restoration/bathroom renovation Page 12-13

The powerful system with diamond and carbide-coated tools for perfectly cutting out tiles, removing tile joints and trimming tile adhesive.

FEIN professional set for heating/sanitary installation Page 14-15

The ideal system for making cut-outs in panels and for precise laying of electrical cables, water and heating pipes.

FEIN professional set for grout renewal Page 16-17

The special range of accessories allows you to cut out damaged elastic sealants in building construction and civil engineering and cut working time by up to 60%. Also suited to removing joints damaged by harmful materials.

Satisfies the most stringent requirements in terms of performance and quality – whether used as a mains or battery-powered tool.

The FEIN SUPERCUT CONSTRUCTION is the unique oscillating power tool on the market and its performance is consistently focused on the needs of tough sawing and cutting work. FEIN has thereby developed an oscillating tool which permits work to progress at levels that can otherwise only be achieved with professional jigsaws and sabre saws with numerous applications and materials. At the same time, this tool can be used for virtually any application, a feature only found in oscillating power tools.

The benefits for you at a glance

- ▶ More than 40 years of experience in oscillation technology.
- ▶ The high quality you'd expect from a "Made in Germany" tool.
- ▶ Mains-powered and cordless versions provide the same power.
- ▶ Unbeatable performance and versatility.
- ▶ FEIN genuine accessories for the best results and maximum tool life.
- ▶ Sets tailored to the relevant needs supplied in a plastic tool case.

QuickIN

Patented QuickIN clamping system for convenient and fast tool changes without a wrench.

Metal gearbox

Robust metal gearbox housing for long service life even in tough working conditions.

Oscillation

Outstanding work progress thanks to constant oscillation.

Tool mounting

Force-fit hexagonal tool holder for optimum torque transfer.

Maximum work efficiency – even with a battery.

Even as a battery-powered tool, the FEIN SUPERCUT remains the most powerful oscillator with durable professional quality. The work progress and performance delivered are practically the same as the mains-powered tool. The modern lithium-ion technology keeps the weight low and prevents memory effects. As 2 batteries and a powerful charger are supplied, you can work without interruption even at high loads.

Design

Angled motor housing for particularly compact design and effective vibration reduction.

Speed control

Consistently high performance with constant speed, even when loaded, thanks to electronic speed control with tachogenerator.

Motor

Efficient, high-torque, 18 V electric motor with identical performance to the mains-powered version.

Ergonomics

Fatigue-free working thanks to ideal distribution of weight and ergonomic shape.

Li-ion battery

High capacity and full performance of 2.4 Ah even when subject to high load thanks to 10 modern Li-ion cells. Capacity display can be accessed directly on each battery.

Technical data

Model		A 18
Battery voltage	V	18
Battery capacity	Ah	2.4
Oscillations	rpm	11 000 – 18 500
Amplitude	Degrees	3.4
Gear box head height	mm	80
Weight	kg	2.0
Tool holder		QuickIN

Emission values (sound/vibration) can be found at www.fein.com/vibration

FEIN lithium-ion technology for optimum performance and endurance.

In conjunction with the motor's high level of efficiency, FEIN lithium-ion batteries deliver the perfect combination of low weight and high performance. Their extremely long service lives are the result of individual cell monitoring, which protects the batteries from overload, overheating and total discharge, and the particularly efficient charging procedure. The low internal resistance of the high-quality cells minimises the build-up of heat in the battery. The battery can therefore be housed in a closed and dust-resistant housing, which also extends the service life.

Benefits of FEIN lithium-ion technology

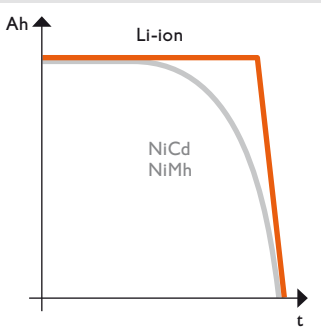

- ▶ Long service life.
- ▶ Quick charger.
- ▶ Less self-discharge.
- ▶ Individual cell monitoring protects from overload.
- ▶ 50% lighter than NiCd batteries, yet they deliver the same performance.
- ▶ No memory effect – batteries can be charged at any time.

Short charge time

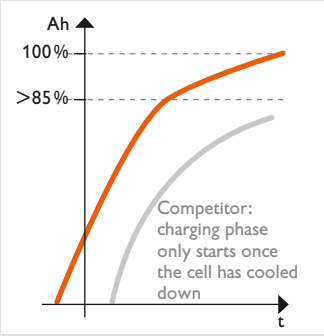

Quick and efficient: the quick charger charges the battery in 25–30 minutes. For continuous working.

Constant power

Powerful from the first cut to the last: the new FEIN lithium-ion technology delivers constant power until the battery is completely flat.

Low heat build-up

Shortened charge time: heat build-up is reduced thanks to high-quality battery cells with low internal resistance and the battery doesn't have to be cooled at outdoor temperatures of up to 45°C.

Integrated working

Convenient querying at the touch of a button: the capacity display indicates the battery's charge status.

Endurance and power

For peak and permanent loading: the battery pack contains 10 high-quality Li-ion cells and features a double-row design. The battery cells used are designed for high discharge currents.

Consistent maximum work efficiency thanks to mains connection.

The FEIN SUPERCUT is the most powerful oscillator with durable professional quality. In the mains-powered version, the flexible, extra long 5 m rubber cable enables a wide range of applications on the construction site.

Motor

Maximum performance thanks to high copper content of the FEIN high-power motor, which is suited to continuous use and overload.

Speed control

Consistently high performance with constant speed, even when loaded, thanks to electronic speed control with tachogenerator.

Industrial cable

Large working radius thanks to finely stranded 5 metre rubber cable of industrial quality.

Ergonomics

Fatigue-free working thanks to ideal distribution of weight and ergonomic shape.

Upping the pace on the construction site – with the professional set for interior work with wood.

Whether you're dealing with simple on-site installation or fitting furniture, flooring, doors, lightweight walls or stairs, your work is made considerably easier with the FEIN professional set for interior work with wood. The FEIN SUPERCUT CONSTRUCTION offers speed and convenience wherever circular saws, jigsaws and sabre saws are needed and where manual tools previously needed a great deal of manual effort. You therefore no longer need any free space behind the workpiece. The FEIN SUPERCUT

CONSTRUCTION can work at any angle and flush to all surfaces. Thanks to the HSS saw blade and the depth stop, you can also make long cuts in ready-laid parquet or laminate flooring with ease. You can even use it to easily and quickly make precise cuts by hand.

Fitting kitchens and furniture

You can make cut-outs in hard-to-reach places with ease when fitting kitchens and other furniture.

Order number
6 35 02 164 01 0

Plunging with precision

The long E-CUT long-life saw blades are the alternative to mortise chisels, enabling you to work on-site with construction woods up to approx. 80 mm.

Order number
6 35 02 163 01 0

Shortening door frames

Produces perfect results in shortening door frames. Thanks to the shape, you can saw flush to the surface.

Order number
6 35 02 165 01 0

Infinite sawing options

The FEIN SUPERCUT CONSTRUCTION does not require any free space behind the workpiece. Subsequent cut-outs, for example in fitted skirting boards, can be made at speed and with precision.

Order number
6 35 02 164 01 0

Robust and powerful

FEIN E-CUT long-life saw blades offer impressive high cutting speeds and over 3 times the tool life of E-CUT standard saw blades. Thanks to their bimetal teeth they are not affected by nails in the wood.

Order number
6 35 02 164 01 0

Trimming and fitting freely by hand

The E-CUT precision saw blades ensure a neat cross-section – ideal for trimming and fitting.

Order number
6 35 02 121 01 1

Reworking expansion joints

The HSS saw blade for wood is excellently suited to accurate sawing e.g. parquet or laminate flooring. Fired stoves can therefore be subsequently fitted with ease, and working with wall and ceiling coverings is child's play.

Order number
6 35 02 153 01 0

Sanding parquet

The FEIN SUPERCUT CONSTRUCTION can also be used as a high-quality delta sander, e.g. as an addition to the parquet sanding machine, particularly when space is tight.

Order number
6 38 06 129 02 6

FEIN professional set for interior work with wood

The powerful system for interior fitting and renovation with special accessories for fast and precise sawing work when fitting wood.

Neater and faster renovation of windows – with the professional set for repairing/replacing windows.

Do you need to make repairs in the workshop or dismantle or fit new windows on the construction site? The FEIN SUPERCUT CONSTRUCTION with the FEIN professional set for repairing/replacing windows is perfect for both areas, as it cuts

working time on putty-mounted insulation windows by up to 80%. Old windows can be neatly dismantled on the construction site without damaging walls, tiles, window sills or roller shutter cases, making the work quicker, easier and neater.

► REPAIR

Cutting out putty-mounted insulation glass windows

Putty-mounted insulation windows can be removed on-site in one piece without the windows having to be broken up using the segment-shaped cutter blade. This means there's practically no risk of injury, no time-consuming tidying up and you cut working time by up to 80%.

Order number
6 39 03 166 01 6

Removing putty from glass

The FEIN SUPERCUT is the alternative to compressed air chisels and putty cutters, e.g. for removing putty from single and multi-layered glazing – with virtually no risk of glass breakage and no laborious preparatory work.

Order number
6 35 02 137 01 6

Cutting insulation glass

The mushroom-shaped cutter blade cuts insulation windows at speed and with ease. Undamaged single panes can be used for repairs elsewhere. Separating materials for disposal is extremely easy.

Order number
6 39 03 128 01 2

Removing paints

Old paints can be removed at speed with the triangular polygon sanding pad. A round backing pad is available for large surfaces.

Order number for sanding pad
6 38 06 129 02 6
Order number for backing pad
6 38 06 195 02 0

Restoring old windows

Weathered windows are often restored individually when renovating listed properties. With the E-CUT universal saw blade, you can precisely cut out damaged wing parts and replace them with new wooden parts.

Order number
6 35 02 148 01 3

► DISMANTLING OLD WINDOWS

Fitting roller shutter case covers

The HSS saw blade for wood can also make longer, straight cuts. Roller shutter case covers and similar parts can thereby be precisely produced or adjusted on-site at any time.

Order number
6 35 02 153 01 0

Replacing old windows

The HSS saw blade makes it possible to replace old windows even in problematic cases. Wall damage can be avoided and the saw blade lies flush to the frame. It can also cut through metal fastenings with ease.

Order number
6 35 02 137 01 6

Cutting out and fitting

E-CUT universal saw blades for all cut-outs and fitting work. Bi-metal teeth make them well-suited to wood, plastics, plasterboard, plaster, aluminium profiles, and even sheet metal.

Order number
6 35 02 147 01 5

Removing window frames

The FEIN E-CUT saw blades allow you to remove window frames rapidly and with minimum effort. The design principle virtually eliminates the possibility of damage to roller shutter cases or window sills.

Order number
6 35 02 163 01 0

FEIN professional set for repairing/replacing windows

The powerful system for interior fitting and renovation with special accessories for dismantling old windows and replacing putty-mounted insulation windows.

Replacing tiles with high-precision joints – with the professional set for tile restoration/bathroom renovation.

When undertaking repair work in sanitary installations, tiles must be replaced as quickly and as exactly as possible. The professionals set for tile restoration/bathroom renovation gives tiling professionals everything they need for the job. It can be used to cut out individual tile joints and replace tiles without damaging neighbouring ones. Grouting cement materials can be

cut out with precision, producing the minimum amount of dust and without overcutting, even in corners and radii. It's ideal for sawing flush to old heating pipes, trimming, cutting out, cutting and fitting drywall profiles, corner strips or floor panels.

Removing tile joints

The 2.2 mm wide diamond-coated segment blade cuts marble, epoxy resin and concrete trass joints. Tiles can subsequently be broken and removed.

Order number
6 39 03 162 01 7

Working with narrow tile joints

In addition to the 2.2 mm wide diamond-coated segment blade, the set also includes an extra thin carbide segment blade, only 1.2 mm wide, for working with particularly narrow tile joints.

Order number
6 39 03 224 01 0

Removing residue

The carbide rasp can remove plaster and screed residue or sand down tile adhesive before re-tiling at speed and with ease.

Order number
6 37 31 001 01 4

Sawing flush to pipes

Copper heating pipes which are no longer needed can be sawn off flush to the wall or floor using the stepped E-CUT universal saw blades – even in hard-to-reach places.

Order number
6 35 02 148 01 3

Scraping off floor coverings

New flooring needs a clean surface. The stopper knife allows you to remove even stubborn residue left behind by old floor coverings.

Order number
6 39 03 227 01 0

Removing silicone and acrylic grout

The mushroom-shaped cutter blade can remove damaged, elastic silicone or acrylic joint fillers at speed and without leaving residue. New joint materials can be applied without the need for rework.

Order number
6 39 03 128 01 2

Renovating large surfaces: Renewing tile joints instead of completely re-tiling.

The FEIN SUPERCUT CONSTRUCTION is in its element when restoring damaged or shabby tiles on large surfaces, e.g. in hotels or housing areas. It's the ideal tool for cost-effective renovation. The job can be done in a decent amount of time – and in comparison to complete renovation, you save around 80% in cost! As an option, the tool is available with dust extraction devices which can be fitted tool-free.

Cutting out joint materials containing epoxy resins

Excellently suited to cutting out particularly hard tile joints such as extremely waterproof epoxy resin joints in swimming pools.

Order number
6 37 31 162 01 7

FEIN professional set for tile restoration/bathroom renovation

The powerful system for interior fitting and renovation with special accessories for perfect removal of tiles and joints in bathroom renovation.

Ausführliche Informationen zu den Sets siehe Seite 19

Sanding down surfaces

Carbide rasp for sanding down tile adhesive, plaster, filler, concrete and stone. The large version delivers particularly good work progress and efficient machining of several square metres.

Order number
6 37 31 005 01 0

Long-life saw blades

For continuous use, round diamond or carbide saw blades with an extra large diameter are available for maximum tool life and cutting speed. Because they are twisted, they achieve a considerably longer service life than segmented blades.

Order number
6 35 02 172 01 0

Extracting dust

The dust extraction unit for the FSC 2.0 Q mains-powered tool can be used to prevent dirt and dust, for example when removing thick layers of tile adhesive or several millimetres of plaster.

Order number
9 26 02 074 01 4

Installing underfloor heating – with the professional set for heating/sanitary installation.

The prefabricated systems available on the market require long drying times and relatively large installation heights. Neither of these are possible in occupied properties. As a consequence, subsequent installations required a lot of time and money until now. The FEIN professional set for heating/sanitary installation provides you with a cost-effective way to fit individual sanitary installations – without time-consuming prising open or plaster work.

You can thereby make individual cut-outs directly in the ready-laid panels with ease. It's highly precise and produces minimal dust – no matter whether you're dealing with angular or round cut-outs. You benefit from fewer costs for heating and sanitary installations. Heating and hot water pipes and power lines are laid quicker and the most important tools for removing damaged tile joints are included in the set.

Making cut-outs

With the FEIN cutting tool, the channel for hot water underfloor heating is cut directly in the panel.

Order number
6 39 03 221 01 0

Laying pipes individually

A 1/2 or 3/4 inch plastic water pipe is laid in the individually made cut-out (Ø approx. 25 mm).

Order number
6 39 03 221 01 0

Installation work

All 3 cutting tools are included in the professional set for heating/sanitary installation: 12 mm for electrical cables, 13 mm for electric, wall or property heating, and 22 mm for underfloor heating or water pipes.

Order number
6 39 03 222 01 0 (12 mm)
6 39 03 223 01 0 (13 mm)
6 39 03 221 01 0 (22 mm)

Cutting panels

The straight cutter blade can cut panels at speed and with ease. You can make all the important radii as well as straight cuts.

Order number
6 39 03 116 01 1

Removing tile joints

Tile joints can be cut out without damaging neighbouring tiles using the diamond segment saw blade. This keeps the amount of dust produced extremely low – ideal for all repair work or removing old installations.

Order number
6 39 03 162 01 7

Sawing flush to pipes

Old copper and plastic pipes which are no longer needed can be removed by sawing flush to the wall with the FEIN SUPERCUT and the E-CUT universal saw blades.

Order number
6 35 02 148 01 3

Removing tile adhesive

The carbide rasp can remove tile adhesive, plaster and screed, enabling the replacement tile to be quickly fitted.

Order number
6 37 31 001 01 4

Removing floor coverings

The enlarged stopper knife can quickly remove carpet, linoleum or PVC floor coverings, tile adhesive and plaster.

Order number
6 39 03 227 01 0

FEIN professional set for heating/sanitary installation

The powerful system for interior fitting and renovation with special accessories for the key applications in sanitary repairs.

Renew grout in record time – with the professional set for grout renewal.

Grout sealants age and need to be replaced at some point so as to not damage the building fabric. It's a cumbersome and exhausting manual task. The professional set for grout renewal doesn't only make this task easier and a great deal faster than doing it by hand, but it also requires considerably less energy. In the case of older properties, grout sealants containing PCB were also used as well as the largely safe acrylic or silicone-based grouts. The professional

set for grout renewal includes a dust extraction device which is suited to the job and, when used in conjunction with an approved dust extractor and the specified protective measures, guarantees the best possible health protection. The professional set can quickly and safely remove all elastic sealants in both exterior and interior spaces. And you still only need one tool to remove old material and roughen joints before filling them in again.

► SAFE JOINT MATERIALS

Cutting out sealants

The straight cutter blade can be universally used to cut out all elastic grout sealants. Ideal for large properties: the energy-saving handle contained in the professional set.

Order number
6 39 03 117 01 5

Working with deep joints

Until now, manually working with deep joints has been a particularly difficult task. This will no longer be a problem with the long cutter blade.

Order number
6 39 03 116 01 1

Cleaning and re-sharpening

The cleaning block is used to re-sharpen and clean diamond tools, enabling you to remove sealant residue and other impurities at speed and with ease.

Order number
6 37 19 007 01 0

Cleaning flanks

The diamond cleaning blade cleans and roughens mortar flanks before you fill them in again, guaranteeing optimum adhesion of the new sealant material.

Order number
6 39 03 161 01 4

► **HAZARDOUS JOINT MATERIALS (e.g. PCB)**

Working with minimal dust

The FEIN SUPERCUT allows you to remove the sealant material, producing minimal dust, with a fitted extraction device.

Order number
9 26 02 084 01 0

Roughening mortar flanks

With the diamond cleaning blade, the extraction device can be used to roughen mortar flanks as well as remove the sealant material.

Order number
9 26 02 084 01 0

FEIN professional set for grout renewal

The powerful system for interior fitting and renovation with special accessories for grout renewal.

For detailed information about the sets, see page 20

A perfect match for every need: the FEIN SUPERCUT sets.

The FEIN SUPERCUT system is perfectly matched to the everyday requirements and needs of its users – with an extensive range of accessories for numerous professional applications. You can choose between a mains-powered or cordless version, offering the same performance and the best FEIN quality. For numerous industries, the FEIN SUPERCUT is also available in various needs-based professional sets in a practical tool case.

FEIN genuine accessories: perfectly matched to the tool and application.

Only FEIN genuine accessories allow you to optimally exploit the versatility and capacity of the FEIN SUPERCUT.

- ▶ Outstanding progress in the development of oscillation technology guarantees accessories that are optimally matched to the tool's movement.
- ▶ FEIN genuine accessories are made from high-quality materials and are therefore designed for extreme loads in practical use.
- ▶ Used in conjunction with the FEIN SUPERCUT, the FEIN genuine accessories guarantee optimum work progress and precision.
- ▶ Wide range of unique accessories to satisfy a whole host of requirements, with numerous exclusive FEIN application solutions.

Round saw blades

The new diamond and carbide saw blades with a diameter of 105 mm offer both maximum tool life and, due to the increased stroke, optimum work progress. The saw blades are available with cutting widths of 1.2 mm and 2.2 mm.

FEIN E-CUT long-life saw blades

FEIN E-CUT long-life saw blades offer impressive high cutting speeds and over 3 times the tool life of E-CUT standard saw blades. Thanks to their bimetal teeth, the wooden saw blades are not affected by any nails (up to diameter of 4 mm), masonry etc. in the wood.

Depth stop

Thanks to the patented, mechanical interface, the FEIN SUPERCUT can, for instance, be used with a depth stop too.

Carbide rasp

The new large carbide rasp provides rapid work progress and is perfectly suited to sanding down filler, tile adhesive, concrete, cement and stone. It can also be used with dust extraction.

Rigid stopper knife

New floorings need a clean surface. The enlarged stopper knife allows you to quickly remove even stubborn residue left behind by old floor coverings and adhesive.

ACCESSORIES

Accessories for interior work with wood / repairing/replacing windows

E-Cut long-life saw blades

Bi-metallic teeth, stepped, high cutting speed. Extremely durable and robust. For hardwood, softwood and all other timber-based materials - including those with nails. Also perfectly suited to plastics and plasterboard.
