FEIN DUSTEX: powerful, safe, mobile.

The new standard for extraction.

NEW!
DUSTEX premium class

The air is pure: create a working environment free from pollutants.

When you think about dangers at work, dust may not be the first thing that comes to mind. But working in a dusty environment is very risky to your health. The FEIN DUSTEX extractors have connections for FEIN tools and lots of adapters for other devices, allowing you to keep the air and environment clean and free of dust. As an additional bonus, this all-rounder doesn't just extract dry dirt but can handle liquids too.

Protects airways, accessories and your wallet: the automatic cleaning processes extend the life of the filter and cut your ongoing operating costs.

Areas of application

Model	DUSTEX 25 L	DUSTEX 35 L	DUSTEX 35 LX	DUSTEX 35 LX AC	DUSTEX 35 MX	DUSTEX 35 MX AC
	Compact class		Premium class			
Dust class	L	L	L	L	M	M
Liquids	●	●	●●●	●●	●●●	●●
Coarse dirt	●●	●●●	●●	●●	●●	●●
Fine dust	●	●	●●	●●●	●●	●●●
Dusts harmful to health	-	-	-	-	●●	●●●

● small amounts ●● large amounts ●●● very large amounts

In accordance with EN 60335-2-69, harmless dusts, such as household dust, gypsum or sand, are classified as dust class L. They have an occupational exposure limit (OEL) of $> 1 \text{ mg/m}^3$. For dust extractors of dust class L, the filter material is checked and there are no disposal requirements. The filter used may have a maximum permeability of $\leq 1.0 \%$.

In accordance with EN 60335-2-69, dust class M includes e.g. dusts from timber (beech, oak), paint, ceramics, putty, filler, cement, concrete, tile adhesive, but also latex and oil-based paints or materials containing quartz. These materials have an occupational exposure limit (OEL) of $\geq 0.1 \text{ mg/m}^3$, so the entire device is checked. Because class M dusts are harmful to the airways, little may escape during disposal. The filter used may have a maximum permeability of $< 0.1 \%$.

An overview of the new FEIN DUSTEX premium class.

The FEIN DUSTEX premium class combines everything you expect of a professional cleaning device. It satisfies all the criteria of a FEIN power tool: a powerful turbine, high capacity and extreme durability.

The tested filter systems capture even very fine dust harmful to health, thereby promoting a healthy workplace. Automatic filter cleaning makes for long filter lives and therefore effective, non-stop working free of pollution.

Proven filter technology

- ▶ The high-quality filters are automatically cleaned with the AutoClean system AC and are easy to access from the outside.
- ▶ The filters are resistant to moisture and can also be used to extract liquids. They continue to run without the need for conversion and reduce ongoing operating costs.

Very high suction power

- ▶ A 254 mbar vacuum and 4320 l/min volumetric flow at the blower ensure above-average suction force.
- ▶ The infinitely variable speed control allows the suction performance to be set with precision.

Incredibly simple handling

- ▶ The new case holder is suited to all common case systems. So the tool is always to hand when needed.
- ▶ The ergonomic push bar greatly simplifies transport.

Maximum agility

- ▶ The large, non-marking wheels make the DUSTEX even more flexible and leave no trace.
- ▶ The bumpers above the wheels even allow the new extractors to be pulled over stairs with ease.
- ▶ The 4 m suction hose and 7.5 m mains cable enable a large working radius.

Performance data

Model	DUSTEX 35 LX	DUSTEX 35 LX AC	DUSTEX 35 MX AC
Fully autom. filter cleaning	-	●	●
Weight according to EPTA	13.5 kg	14.1 kg	14.1 kg

An overview of the FEIN DUSTEX compact class.

Small, light and powerful: The extractors in the FEIN DUSTEX compact class provide the basis for effective dust extraction and a clean, unpolluted workplace. The reliable and versatile extractors are easy to operate, agile, very robust and have a long life.

Whether you work with swarf, metal, dust, sand or liquids – the FEIN DUSTEX compact extractors are indispensable for daily, professional use.

High degree of effectiveness

- ▶ A 253 mbar vacuum and 4320 l/min volumetric flow at the blower ensure a strong suction force.

Simple handling

- ▶ The practical storage area with edge, cable and hose hooks and a 4 m suction hose ensure mobility and a high freedom of movement.

Extreme agility

- ▶ Large, 360° rotating castors allow the DUSTEX to access even tight spaces with ease.
