FEIN tool tips

Offers and new products for professional tradesmen.

The best of the best in one set: E-Cut saw blades with Starlock.

The attractive set of Starlock accessories has many advantages, that more than pay for themselves in daily work.

- ▶ The E-Cut saw blades cover the whole range of materials – from soft and hard wood, to metals and nails.
- ▶ Maximum compatibility: suitable for oscillating multi-tools from FEIN, Bosch, Metabo, Milwaukee, Ridgid, Skil and many other manufacturers.
- ▶ Large scope of supply: 2 x E-Cut long-life 160 (length 50 mm, width 35 mm), 2 x E-Cut long-life 221 (length 50 mm, width 50 mm), 2 x E-Cut standard 222 (length 35 mm, width 28 mm)

The loyalty promotion for saw blades – 4 steps to free saw blades of your choice:

Collect FEIN loyalty points and once you have bought 25 FEIN E-Cut products, you will receive a free pack of 3 saw blades of your choice, worth up to £45.*

- 1. Buy FEIN E-Cut blades.**
Simply buy a total of 25 saw blades.
- 2. Register online.**
Scan the QR code or register at www.fein.com/bonus, upload your invoice and enter the EAN code.
- 3. Collect loyalty points.**
You are automatically credited with one point for every registered E-Cut saw blade.
- 4. Receive free E-Cut blades.**
Once you have collected 25 points, you receive a free pack of 3 FEIN E-Cut saw blades of your choice.

*1 FEIN E-Cut saw blade = 1 loyalty point.
Saw blades included in promotion: FEIN E-Cut saw blades in individual or multi-packs – combos, Best of E-Cut sets, sets of accessories etc. are not included.

FEIN cordless angle grinders with innovative POWERDRIVE motor. Durable, powerful and robust.

The new FEIN cordless angle grinder features a major advance in technology: the next generation of the brushless FEIN POWERDRIVE motor. At the very heart of the tool, this motor delivers impressive

durability and a very long service life. The fully enclosed motor housing protects the motor from dirt and dust and renders additional protective measures on the tool unnecessary.

NEW

Durable, brushless FEIN POWERDRIVE motor

fully encapsulated and maintenance-free.

Powerful, 30% higher efficiency

compared with universal motors with a rated output of 1100 W.

Maximum work progress

with FEIN HIGHPOWER Li-ion batteries. Cells capable of high currents with continually high power output and 75% higher current rating than Li-ion batteries make up to 41% more cuts possible.*

Ideal for various applications

Optimum speeds, matched to a large number of abrasive materials and other materials using the infinitely variable, electronic speed preselection.

Focus on user protection

Brake for rapidly bringing wheel to a stop.
Restart protection protects against switching back on unintentionally.
Overload protection for electronics and motor.
Soft start to evenly and safely power up the tool.

Comfort switch with dead man function

MultiVolt interface

Non-slip handle area

* Compared with the FEIN 18V/5Ah battery with 125 mm diameter cutting wheel. S235JR round material, diameter of 16 mm.

The new heart of the tool: the innovative FEIN POWERDRIVE motor.

- ▶ **Very smooth running and low-vibration working** thanks to motor being decoupled from the housing and mounted separately and four additional vibration dampers.
- ▶ **Innovative cooling ribs** for optimum heat dissipation, including monitoring of temperature in the motor's core to protect against overload.
- ▶ **Quick-stop function** without mechanical brake.
- ▶ **Speed stability** for significantly higher speed consistency at load compared to universal motors.
- ▶ **Zero maintenance and little wear** ensure long service life. No need to change carbon brushes.

*Maximum performance with FEIN HIGHPOWER Li-ion battery

The FEIN cordless die grinders: specialists in grinding, brushing, deburring and polishing.

NEW

Compatible with all FEIN Li-ion batteries

thanks to MultiVolt interface.

Plunges a long way

into workpieces thanks to its long, slim neck.

Powerful, 30% higher efficiency

compared with universal motors with a rated output of 1100 W.

Ideal for various applications

Optimum speeds for applications in stainless steel and black steel, infinitely variable.

Very smooth running and low-vibration working

due to brushless, independently mounted housing, which is decoupled from the motor.

New accessories for the FEIN cordless drill/drivers with QuickIN and QuickIN MAX interface.

Work with even greater reliability with the new QuickIN accessories. Advanced technology from FEIN optimises processes and maximises results. The self-clamping drill chuck is compatible with all FEIN cordless drill/drivers with QuickIN MAX interface. The hole saw adapter is compatible with all tools with QuickIN / QuickIN MAX interfaces.

SKE drill chuck

Drill chuck with automatic re-tensioning

- ▶ Prevents twist drills and threading drills from slipping.
- ▶ Clamping range 1.5 - 13 mm. High concentricity of up to 0.35 mm for precise working.
- ▶ Compatible with all FEIN cordless drill/drivers with QuickIN MAX interface.

Tip

Usage tips for hole saw adapter

- ▶ We recommend the ASCM 18 QM for the FEIN hole saw adapter:
 - ▶ The 4-speed gearbox offers optimum cutting speeds for every diameter.
 - ▶ Particularly fast drilling is possible in speed 2 at 800 rpm.
 - ▶ Drilling in speed 1 at 400 rpm produces fewer vibrations.
 - ▶ To protect the user, drill in torque stage 15 and use the additional handle.
- ▶ The adapter is compatible with drill bits and hole saws with a QuickIN PLUS fitting.
- ▶ Given the torques produced and the risk of injury from sudden blocking, we would recommend using hole saws with cordless drill/drivers only up to 40 mm.

Speed recommendations depending on hole diameter and material*

Diameter in mm	Speed in rpm	
	Construction steel	Stainless steel
14	910-1360	450-1150

*Details refer to load speeds.

Extremely light, compact and powerful: the new FEIN cordless rotary hammer drill ABH 18.

The cordless rotary hammer drill for universal working has a brushless motor, delivering high impact energy for continuous work progress. This allows holes with diameters of up to 20 mm to be drilled in

concrete with ease – the work is comfortable and low-fatigue thanks to the compact design and low vibrations. Two forms of safety switch-off protect the user and tool.

NEW
from April 2018

Drilling dust nozzle for minimal dust.

The optional drilling dust nozzle protects the user against high dust levels. The nozzle securely adheres to all standard wall and ceiling surfaces. Compatible with all wet/dry dust extractors with a 35 mm suction hose.

Combination hammer with three functions:

hammer drilling, drilling and chiselling.

Extremely light and compact design

weighing just 3.0 kg including battery (5 Ah).

Continuously high cutting speed

brushless motor.
High-power striking mechanism with 2 J.
80 holes with one battery charge (5 Ah).

User protection

safety clutch stops the rotary hammer drill should the drill chuck jam.

Long service life

FEIN SafetyCell Technology protects the battery and tool from overloading, overheating and total discharge.

Typical potential applications

Hammer drilling

Hammer drill up to 20 mm in concrete.

Drilling

Produce 68 mm socket holes in masonry.

Chiselling

Remove excess concrete.

* 10 x 75 mm at 5 Ah

Highlight

A clean trio: rotary hammer drill, drilling dust nozzle and extractor.

Maximum clean working through the combination of cordless rotary hammer drill, drilling dust nozzle and DUSTEX extractor. Perfectly matched to one another, they provide optimum protection from dust and dirt.

FEIN DUSTEX 35 MX AC

The high-quality filter is automatically cleaned with the AutoClean system AC and extends the life of the flat fold filter for uninterrupted working. All M class dusts which are harmful to health are reliably extracted. The extraction of liquids is possible too. The FEIN DUSTEX 35 MX AC features a push bar, large wheels, 4 m suction hose and 7.5 m mains cable, giving it maximum agility.

Core drilling expertise from the inventor of the power drill.

In 1895, FEIN invented the world's first electric hand drill, and in 1909, first electromagnetic drill GMAZ. The same spirit of innovation and German-built quality goes into every FEIN drill. With more than 120 years of ongoing development, FEIN has succeeded in perfecting metal drilling technology. Professionals put their trust in the long-life quality of FEIN and rightly so.

The benefits:

- ▶ First-class materials and excellent workmanship – premium quality from one source.
- ▶ Performance and quality leader for drilling and core drilling.
- ▶ Tool, core drill bit and system accessories are precisely matched to one another – perfect for drilling in steel, stainless steel or aluminium.
- ▶ Two series cover all applications – from core drilling and twist drilling to countersinking and tapping.

FEIN KBB series: Solid basic functionality – focused on core drilling applications.

With four different models, the FEIN KBB series includes the optimum tool for every workshop and installation application – from the compact FEIN KBB 30 for core drilling in tight and difficult-to-reach spots to the powerful 2-speed tool KBB 60 for use in the workshop. Every tool in the range is designed to be reliable and economical, delivering precise results.

The benefits:

- Basic core drilling function.
- Sturdy construction for tough applications.
- Internal motor cable guide.
- Optimised speed for use with HSS core drill bits.

KBB series – focused on core drilling applications.

Universal motor

Stable torque – with good delivery of power when core drilling.

Solid construction

Good results from high material quality and workmanship of all components.

Motor cable

Internal motor cable guide. No getting caught or snagging on the workpiece.

Feed handwheel

The feed handwheel can be transferred to the other side when working in confined spaces.

KBB 30/KBE 30

Extremely compact for drilling on the construction site.

KBB 38

For precision drilling on the construction site.

KBB 40

Compact with fixed drill motor for work in tight spaces.

KBB 60

With 2-speed gearbox for drilling jobs in the workshop, cutting depth up to 75 mm.

RRP including VAT	£1371.60

HIGHPOWER battery starter set

FEIN SELECT+ 2 x HIGHPOWER Li-ion batteries with ALG 50 rapid charger.

Voltage	Capacity	Order number	RRP plus VAT	RRP incl. VAT
V	Ah			
18	5.2	9 26 04 311 01 0	£320.52	£384.62

Benefits of use

- ▶ Continuously good work progress thanks to brushless FEIN POWERDRIVE motor and FEIN HIGHPOWER storage battery.
- ▶ Universal use thanks to forward/reverse running, electronic speed setting, MT2 tool mounting and 260 mm stroke range.
- ▶ Continuous mobile working thanks to FEIN HIGHPOWER storage battery.
- ▶ Easy tool positioning thanks to minimal weight and permanent magnet with magnetic bias.

Benefits of use

- ▶ Overall height of 169 mm provided by fixed drill motor for working in tight spaces.
- ▶ Universal use thanks to forward/reverse running, electronic speed setting and large installation space.
- ▶ Easy tool positioning as it weighs just 7.5 kg.
- ▶ Continuously good work progress thanks to high speed stability of the FEIN high-power motor with tacho electronics.

Overcome every challenge: the versatile range of core drills from FEIN.

The FEIN core drills range includes the right tool for every job. From hand-guided to stationary core drilling, FEIN covers every metal drilling application with diameters of 0.5 mm to 80 mm and cutting depths of up to 75 mm. From the flexible hand-guided metal core drilling system with fast cutting speed to the magnetic core drills in the

Economical, Compact, Universal and Automatic performance classes. We've got the right solution for every application, thanks to our extensive range of accessories.

Hand-guided core drilling system	Magnetic core drills

The FEIN core drill bits: specialists in their field.

Complete product range	Superior quality and tool life	Application know-how
Two quality levels: carbide and HSS. Core drill bit diameter of 12-80 mm. Cutting depths of 25, 35, 50 and 75 mm. Mounting: QuickIN, 3/4" Weldon, M18.	Tough carbide teeth. M2 HSS steel containing 0.5% cobalt. Optimum cutting and clearance angle. High concentricity.	HSS production since 1977. Carbide core drill bit range since 1984.

FEIN HM ULTRA core drill bit

10% faster core drilling than carbide competitors (21 seconds rather than 23 seconds)

25% longer tool life than carbide competitors (420 holes rather than 315 holes)

FEIN HSS NOVA core drill

13% faster core drilling than HSS competitors (23 seconds rather than 26 seconds)

15% longer tool life than HSS competitors (120 holes rather than 100 holes)

HM ULTRA 35 core drill bit with QuickIN fitting

Very long service life and outstanding cutting performance. Metric dimensions, cutting depth 35 mm.

Stainless steel processing. Achieve even better results.

With the right application, the right tool and the perfect approach, you can optimise your results. Removing welded seams or producing a mirror polish on surfaces: now you can achieve even better results with the following tips.

Job and material

Removing welded seams

TIP 1

without damaging adjacent surfaces – depending on the thickness of the welded seam, rough, medium or soft flap sanding discs can be selected.

Tool: WSG 17-70 INOX
Accessories: Rough flap sanding disc

Initial situation

Welded seam on profiles or edges

Application

Removal of the welded seam without damaging the adjacent surface

Result

Outstanding surface without rework

Grinding welded fillet welds

TIP 2

with a new grinding disc and achieving a good sanding capacity

Tool: KS 10-38 E SET fillet weld grinder
Accessories: Grinding disc 6373

Unmachined welded seams with tarnishing in metal constructions

Grind the welded seams in hard-to-access constructions

Even-looking surface and reliable removal of tarnishing on fillet welds

Preparing surfaces and profiling to a satin finish

TIP 3

or polishing to a mirror finish.

Tool: WPO 14-25 E
Accessories: SET sanding sleeves and Pyramix K280, K400, K600, K1400 sanding sleeves

Remove scale and scratches from surface

Surface desired before satin-finishing

Further machining of the surface with K400, K800 and K1400, preparation for polishing

Mirror polish on surfaces and profiles

TIP 4

just a few steps to produce a gloss finish.

Tool: WPO 14-25 E
Accessories: Medium lamella rollers, pre-polishing paste and colouring paste

Surface pre-sanded to K1400, all scratches must be removed

After applying the pre-polishing paste, produce mirror polish on the surface

After processing with the colouring paste, optimum mirror polish on stainless steel surfaces

Producing a satin finish

TIP 5

on mitre joints to visually even out the surface.

Tool: WPO 14-25 E
Accessories: Masking tape, finishing roller

Satin finish without affecting the mitre joints

Cover and visually blend in the mitre joint when satin-finishing

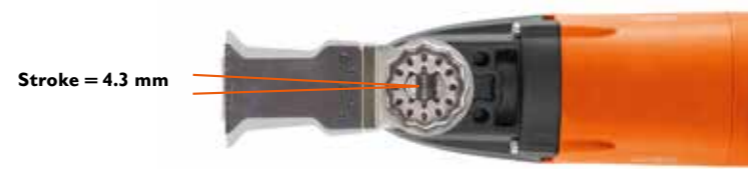

Clean grinding pattern in the mitre joint right up to the edge

FEIN oscillating multi-tool range: the right combination of tool and accessories for all requirements.

We don't consider tools and accessories as stand-alone elements. One cannot achieve its full potential without the other. So we developed a system that ideally combines their strengths. Firstly, our powerful oscillating multi-tools are available as mains- or battery-operated versions. Each product comes with individual benefits, which are essential for efficient, reliable and safe working.

Secondly you will find the most extensive range of accessories on the market, opening up an incredibly wide range of use. Together, they provide outstanding precision, maximum comfort, the best work progress and a perfect result. In a nutshell: this system always provides exactly the right solution for thousands of professional jobs.

<p>FEIN MULTITALENT</p>	<p>The gateway to the professional class. The economical alternative for anyone who cannot afford to compromise on quality and performance, but is not so concerned with maximum operating comfort.</p> 	<p>250 W 12 V 2 x 1.6°</p>	<p>FEIN MULTITALENT STARLOCK STARLOCK PLUS</p>  <p>Stroke = 4.3 mm</p>		<p>Mains-powered</p> <p>START 230V 7 229 54 61 24 0 RRP plus VAT: £123.95 110V 7 229 54 61 24 1 RRP plus VAT: £123.95</p> <p>QUICKSTART 230V 7 229 53 61 24 0 RRP plus VAT: £163.95 110V 7 229 53 61 24 1 RRP plus VAT: £163.95</p>	<p>Battery-powered</p> <p>AFMT 12 SL 7 129 26 61 24 0 RRP plus VAT: £181.95</p> <p>AFMT 12 QSL 7 129 25 61 24 0 RRP plus VAT: £197.95</p> <p>AFMT 12 QSL SELECT* 7 129 25 62 00 0 RRP plus VAT: £122.95</p>		 <div data-bbox="2507 1186 2819 1396" style="border: 1px solid black; padding: 5px; transform: rotate(-5deg);"> <p>You will find more information about the individual FEIN sets at www.fein.com/en.uk/</p> </div>		
<p>FEIN MULTIMASTER</p>	<p>the benchmark amongst oscillating multi-tools. *Non-binding manufacturer's recommended price plus VAT in £.

We have the right saw blade for your very specific application.

FEIN genuine accessories for sawing set standards. They provide solutions to applications for which there are no equivalent alternatives and deliver maximum precision even in the most challenging of applications. The unique accessories permit sawing flush with the

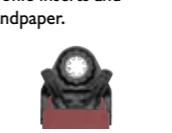

surface and also simple plunging into solid material. The accessories can be clamped in 12 different positions around the oscillator's tool axis, delivering the best performance even in tight spaces.

SELECTION CRITERIA FOR E-CUT SAW BLADES

	Area of application	Teeth
Standard	All wood, plasterboard and plastic materials	set
Standard curved	As Standard but with curved cutting geometry for optimum plunging and clean precise cut edges, especially on smooth surfaces	set radius
Long-life	All wood, plasterboard and plastic materials. Extremely robust HSS teeth, also resilient to nails in wood (up to approx. diameter 4 mm), masonry etc.	set bimetal/HSS
Precision	All wood materials, plasterboard and soft plastics.	double row of JAPAN teeth
Precision BIM	As Precision, but with HSS teeth for longer service life and greater robustness	double row of JAPAN teeth bimetal/HSS
Universal	Wood, plasterboard, plastics and sheet metal up to 2 mm, aluminium profiles and Cu pipes. Incredibly robust HSS teeth.	corrugated bimetal/HSS
Fine	Thin cuts that can be controlled with ease in sheet metal up to 2 mm, aluminium profiles, Cu pipes; also for fibreglass-reinforced plastic and other hard plastics. Incredibly robust HSS teeth.	fine tooth bimetal/HSS

SANDING

Backing pads Plastic carrier material for preventing damage and marks on the workpiece, hook and loop fastening.

<p>Standard version, perforated or unperforated.</p> 	<p>Flat version for very narrow, flat openings (e.g. slats).</p> 	<p>Super-soft version for special applications.</p> 	<p>Finger shape for use in very narrow and deep places.</p> 	<p>Large sanding pads (edge length 130 mm) for fast and efficient sanding. The alternative to eccentric or random sanders. High sanding capacity, universally suitable for corners and edges as well as large surfaces.</p> 	<p>Professional sanding set</p> 
---	--	---	---	---	---

Abrasive material
FEIN abrasives offer outstanding sanding capacity and durability. FEIN has the right sandpaper for every type of application and every job.

<p>Corundum abrasive grit fully bonded with artificial resins for universal use on virtually all materials.</p> 	<p>Super-soft sanding sheets for machining aluminium rims.</p> 	<p>Corundum abrasive grit fully bonded with artificial resins for universal use.</p> 	<p>Corundum abrasive grit fully bonded with artificial resins for universal use on virtually all materials.</p> 	<p>Zirconium sanding sheets for extremely hard surfaces such as varnish (e.g. parquet paint) or metal.</p> 	<p>Corundum abrasive grit fully bonded with artificial resins for universal use.</p> 
--	--	--	---	--	--

CLEANING AND POLISHING

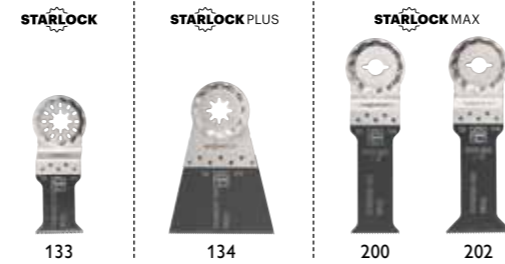

<p>Bristle fleece For cleaning boat decks or cleaning / polishing anti-slip structures.</p> 	<p>Felt polishing pad Felt polishing pad for polishing boat decks (gelcoat), chrome, stainless steel, aluminium, copper and copper alloys.</p> 	<p>Felt polishing pad For polishing up metal parts, and for polishing and decorative polishing of stone and stone products. Plastic carrier plate prevents damage and marks on the workpiece.</p> 	<p>Sanding sheets, foam backing With foam lamination for removing scratches from paintwork, gelcoat, acrylic and polycarbonate glazing, lacquers, wood with a clear lacquer, furniture and many more besides.</p>

SAWS

WOOD

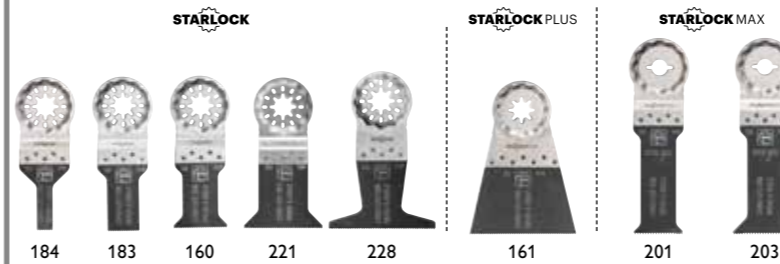

E-Cut standard saw blade

Set teeth for all wood, plasterboard and plastic materials, high cutting quality and speed.

E-Cut long-life saw blade

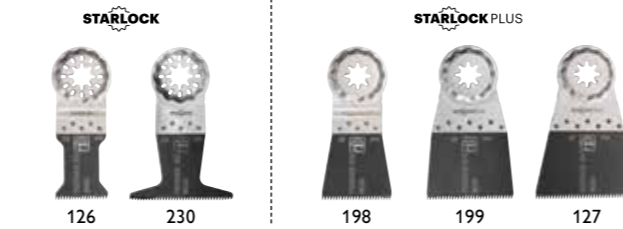

Bimetal with set HSS wood teeth for all wood, plasterboard and plastic materials. Outstanding tool life, high cutting quality and speed. Extremely robust, also resilient to nails in wood, masonry etc.

WOOD

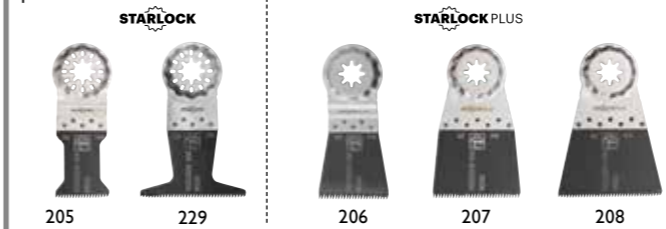

E-Cut precision saw blade

Double-row Japan teeth for all wooden materials, plasterboard and soft plastics. Outstanding work progress and maximum precision.

E-Cut precision BiM saw blade

Bimetal with double-row HSS Japan teeth for all wooden materials, plasterboard and soft plastics. Improved tool life and robustness. Outstanding work progress and maximum precision.

WOOD

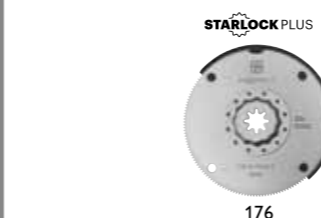

E-Cut Curved HCS

Set teeth for all wood, plasterboard and plastic materials, high cutting quality and speed. Curved cutting geometry for optimum plunging.

HSS saw blade

Bimetal for long tool life. Set HSS wood teeth. Outstanding tool life, high cutting quality and speed. As "mini circular saw", ideal for long, straight cuts and for making cut-outs in laid parquet, laminate and wall panelling.

WOOD/METAL

E-Cut universal saw blade

Bimetal with corrugated HSS universal teeth. Wide range of applications for sheet metal up to 2 mm, aluminium profiles, copper pipes, wood, plasterboard and plastics.

METAL

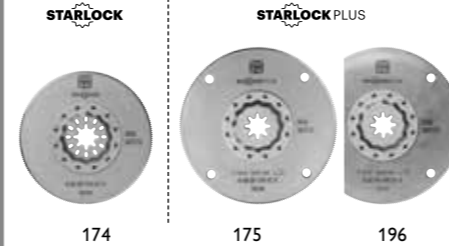

E-Cut fine saw blade

Bimetal with fine HSS teeth for sheet metal up to 2 mm, aluminium profiles, copper pipes. Also for fibreglass-reinforced plastic and other hard plastics. Extremely precise cuts which are very easy to control with particularly thin cutting line.

HSS saw blade

Bimetal for long tool life. HSS metal teeth for sheet metal up to approx. 1 mm. Also for plastics, fibreglass-reinforced plastic, wood, putty and copper/copper alloys. Work flush with the surface.

HSS saw blade

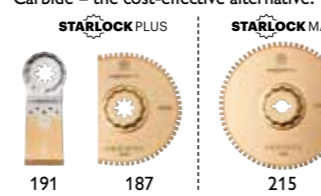

Solid HSS with metal teeth for sheet metal up to approx. 1 mm. Also for plastics, fibreglass-reinforced plastic, wood, putty and copper/copper alloys. Outstanding cutting speed. Clean, thin cutting line.

COMPOSITE

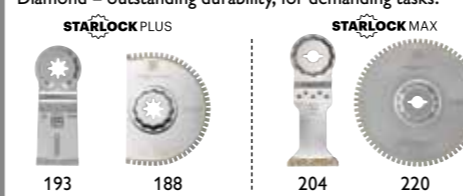

Carbide saw blade

Gentle sawing with perfect, clean cut edges in carbon fibre-reinforced plastic/fibreglass-reinforced plastic materials without delamination. Precise working into corners and on edges or for long, straight cuts with high cutting speed and precision. Carbide – the cost-effective alternative.

Diamond saw blade

Diamond – outstanding durability, for demanding tasks.

SPECIAL MATERIAL

Saw blade

For all soft materials. Segmented, ideal for working in corners and on edges without overcutting.

Segment saw blade

For cutting out putty-mounted insulating glass.

CUTTING AND SCRAPING

SPECIAL MATERIAL

Stopper knife

For removing stubborn old paint, adhesive residue, carpets, tile adhesives and coats of underseal as well as silicone or acrylic joints in sanitary facilities.

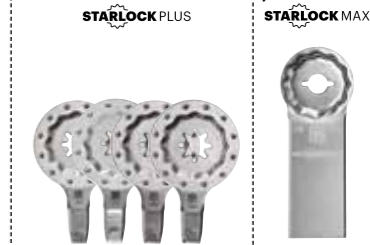

Cutter blade

For cutting silicone and soft putty material and for separating insulating glass units.

For cutting out panelled deck sealant materials safely and at speed.

Can be used universally for virtually all expansion joints.

Diamond-coated for cleaning mortar flanks.

Long blade for very deep joints.

SPECIAL MATERIAL

HSS circular knife

For universal cutting work in leather, plastic sheets, roofing fabric, cork, etc.

E-Cut multi-function knife

With three cutting surfaces for cutting carpet, PVC floors, cardboard, bitumen shingles and roofing fabric.

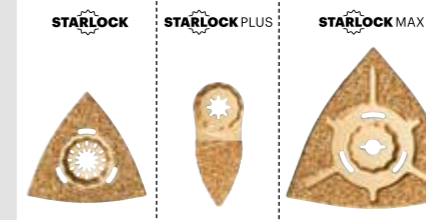

CUTTING AND FILING

GROUT

Carbide rasp

For rough sanding of fillers, tile adhesive, concrete, stone and wood.

Tile joint cleaner

For quick cost-effective cleaning of heavily soiled tile joints.

SPECIAL MATERIAL

Carbide file

For deburring and filing of CFRP / fibreglass-reinforced plastic materials, plastics and wood.

Cutting tool

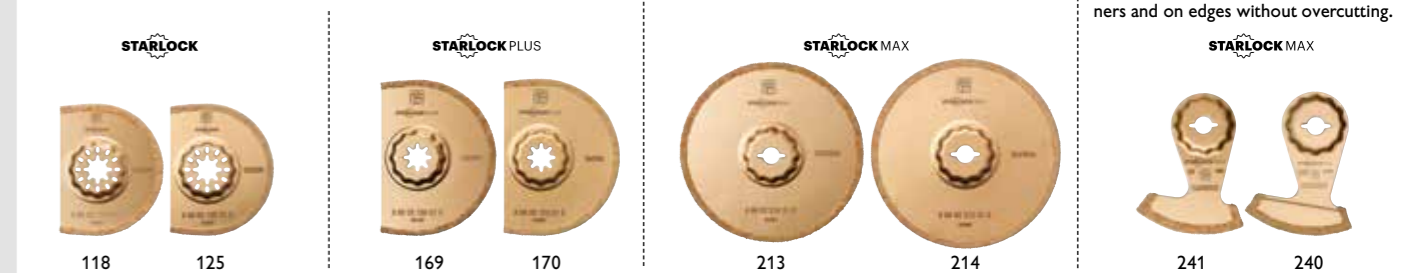

For making grooves in rigid foam panels for electrical, wall and underfloor heating.

GROUT

Carbide saw blade

Segmented, ideal for working in corners and on edges without overcutting. Round shape for long cuts, maximum usage. Segmented, ideal for partial repairs in corners and on edges without overcutting.

GROUT

Diamond saw blade

For cutting out damaged marble, epoxy resin and trass joints. Excellent service life. Also suitable for very hard epoxy resin or cement joints. Segmented, ideal for working in corners and on edges without overcutting. Round shape for long cuts, maximum usage. Segmented, ideal for partial repairs in corners and on edges without overcutting.
