Combining outstanding performance and low weight.

FEIN dry wall screw guns – now available as battery or mains-operated versions

A person is using a bright orange FEIN dry wall screw gun on a wall. The gun is being held with both hands, and a long, flexible strip of orange and black screws is being fed into the front of the tool. The background shows a white wall and a window frame.

**1,800 fittings with one
battery charge!**

FEIN dry wall screw guns – perfect for single and repeated screw fittings.

Outstanding quality and unique performance make FEIN dry wall screw guns the ideal tool for all professionals who undertake interior work. No matter whether you have a mains or battery-operated tool, all FEIN dry wall screw guns can be used for both single and repeated screw fittings thanks to the tool-free slip-on magazine.

As is the case with all FEIN power tools, the performance and quality of the dry wall screw guns are also tested under the toughest conditions both on construction sites and in the lab. The battery version, for example, can perform up to 1,800 screw fittings with just one battery charge – thanks to state-of-the-art lithium-ion technology. The low weight of the screw guns and batteries ensures simple and virtually fatigue-free working – even when it comes to difficult applications, such as overhead working.

Reliable “Made in Germany” quality.

FEIN has been designing, developing and manufacturing screw guns for an extremely wide range of applications in industry and manual trades for more than 40 years. Particularly in the industrial volume production segment, FEIN has been a leading manufacturer of reliable battery-operated screw guns for the automotive industry, for example, for decades. Thanks to this experience and competence, FEIN now produces dry wall screw guns with both mains and battery technology that satisfy the most stringent quality and performance requirements.

Place your confidence in experience and quality

- ▶ Extensive experience in developing and manufacturing
- ▶ Screw guns with mains and battery technology
- ▶ Complete range of professional screw guns for all applications in drywall construction
- ▶ Use of high industrial quality components
- ▶ “Made in Germany”

Two screw guns in one

You can choose to operate FEIN dry wall screw guns with or without the magazine. This means that you’ve always got the right screw gun to hand, whether it’s for precise single screw fittings or quick and reliable repeated screw fittings.

Tested longevity

The FEIN dry wall screw guns produce more than 1 million screw fittings in the test laboratory, without requiring any maintenance – this corresponds to 24 screws per square metre on a surface of more than 40,000 square metres.

Extremely lightweight

With the mains-operated screw gun weighing in at just 1.3 kg and the battery version just 1.6 kg, FEIN dry wall screw guns are among the lightest on the market. This enables virtually fatigue-free working, even for overhead and single-handed applications.

Quick and reliable repeated screw fittings

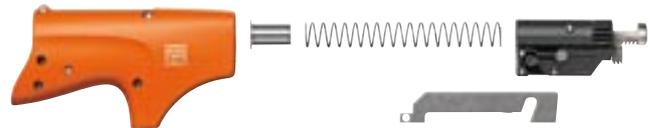

The FEIN magazine M55 with patented screw transport system delivers extremely reliable results – with all strips of screws from leading manufacturers. If required, it can be removed and cleaned tool-free. The screw length can be set to up to 55 mm and is suited to 1-layer to 3-layer sheeting.

Produce screw fittings up to 6-times quicker with the FEIN magazine M55.

The magazine for all FEIN dry wall screw guns is particularly dust-resistant and can be dismantled and cleaned tool-free if required. Thanks to the unobstructed view of the screw tip, precise screw-driving and fitting is made much easier. You can also work with just one hand. Another benefit of the FEIN magazine M55 is that it is compatible with strips of screws from leading manufacturers. All in all, it provides the best conditions for quick and efficient work progress.

Benefits of the FEIN magazine M55

- ▶ Particularly dust-resistant
- ▶ Quick and precise repeated screw fittings
- ▶ Can be slipped on tool-free
- ▶ Easy to remove and clean
- ▶ Delivers reliable results with strips of screws from all leading manufacturers

Precise

Set screw for setting the driving depth in 0.25 mm steps.

Exact

Unobstructed view of the screws for highly accurate screwdriving and fitting.

Variable

Screws with a length of between 25 and 55 mm can be used.

Reliable

Patented system for reliable screw transport, even with very high levels of dust exposure.

Flexible

The FEIN magazine M55 can be slipped onto any FEIN dry wall screw gun tool-free.

FEIN lithium-ion technology with an impressive 2,000 charge cycles per battery.

In conjunction with the motor's high level of efficiency, FEIN lithium-ion batteries deliver the perfect combination of low weight and high performance. Their extremely long service lives are the result of individual cell monitoring, which protects the batteries from overload, overheating and total discharge, and the particularly efficient charging procedure. The low internal resistance of the high-quality cells minimises the build-up of heat in the battery. The battery can therefore be housed in a closed and dust-resistant housing, which also extends the service life.

Benefits of FEIN lithium-ion technology

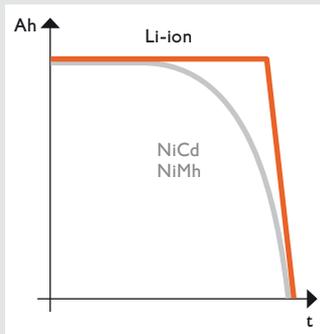

- ▶ Long service life
- ▶ Quick charger
- ▶ Less self-discharge
- ▶ Individual cell monitoring protects from overheating
- ▶ 50% lighter than NiCd batteries, yet they deliver the same performance
- ▶ No memory effect – batteries can be charged at any time

Short charge time

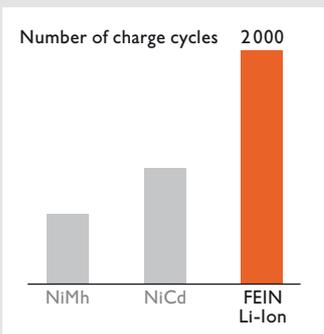

Quick and efficient: the quick charger charges the battery in 25 minutes. For continuous working.

Constant power

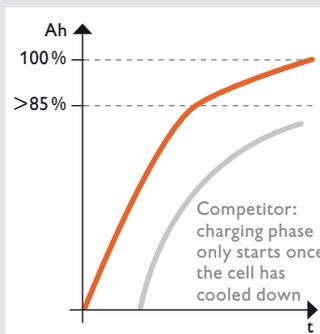

Effective from the first screw to the last: the new FEIN lithium-ion technology delivers constant power until the battery is completely flat.

2,000 charge cycles

Long service life and cost-effectiveness: the perfectly coordinated components – from the battery cell to the charger – enable up to 2,000 charge cycles, which is a great deal more than the competition.

Low heat build-up

Shortened charge time: heat build-up is reduced thanks to high-quality battery cells with low internal resistance and the battery doesn't have to be cooled at outdoor temperatures of up to 45°C.

Integrated working

Convenient querying at the touch of a button: the capacity display indicates the battery's charge status.

Endurance and power

Coordinated components: perfect interplay between battery pack and EC motor deliver high power.

Silent

Silent and wear-free FEIN CLICK-STOP clutch.

Dust-protected

A dust ring on the bit provides the inside of the machine with effective protection from dust and dirt.

Precise

The depth stop, which can be adjusted in 0.25 mm steps, delivers the ideal driving depth and ensures the screws are positioned perfectly.

Variable

Easy to change from individual to autofeed screwdriver thanks to stop sleeve which can be removed tool-free.

Flexible as a mains-operated tool too.

The specialist for dry wall construction and interior work! The FEIN mains-operated dry wall screw gun SCT 5-40 X and SCT 5-40 M not only delivers high speed, but outstanding ergonomics too. It's a lightweight tool that sits perfectly in your hand. The design is so compact that you can even work in tight spaces with ease. The tool is fitted with a hand strap to reduce the strain on the operator during continuous use. As with all FEIN professional screw guns, the SCT 5-40 also features extra dust protection and is extremely robust. It's here that FEIN's long-standing screwdriving expertise pays off.

Benefits of the FEIN dry wall screw gun

- ▶ Low weight of just 1.3 kg for fatigue-free working
- ▶ Patented FEIN CLICK-STOP clutch
- ▶ Depth stop can be adjusted and replaced with ease
- ▶ Can be used with and without magazine

Easy to use

The small handle size and the ergonomic design guarantee ease of use and virtually fatigue-free working.

Powerful

The FEIN high-power motor is suited to continuous use and overload. The high copper content ensures maximum power.

Robust

The extra long, finely stranded rubber cable with extra reinforced industrial quality cable grommet.

FEIN dry wall screw guns at a glance.

No matter whether it's a battery or mains-operated version, the FEIN dry wall screw gun and the specially developed accessories enable maximum work progress and perfect results in all applications.

Light and powerful – for up to 1,800 screw fittings per battery charge.

Offering durable quality, low weight and unique performance, the excellent FEIN lithium-ion technology allows battery-operated tools to deliver impressive performance in continuous use and makes FEIN dry wall screw guns the ideal tool for all professionals who undertake interior work: thanks to the low weight of just 1.6 kg, up to 1,800 screw fittings per battery charge and up to 2,000 battery charge cycles.

Benefits of the battery-operated FEIN dry wall screw gun

- ▶ Powerful battery for up to 1,800 screw fittings per charge
- ▶ Low weight of just 1.6 kg for fatigue-free working
- ▶ Can be used with and without magazine
- ▶ Maintenance-free and highly effective EC motor

Practical

The removable hook ensures that you always have the machine to hand.

Powerful

Maintenance-free, brush-free and highly-effective EC motor.

Enduring

14.4 V Li-ion battery with capacity display and perfect balance between power and weight.

Other FEIN tools for drywall construction.

Cutting reinforced profiles

Cut varying thicknesses of profiles conveniently and safely – with FEIN nibblers and FEIN slitting shears.

Creating and widening openings

To install revision flaps or undertake repairs, FEIN recommends the battery-operated FEIN SUPERCUT with E-CUT saw blade.

Fitting reinforced profiles

The speed-optimised screwdriver FEIN SCS 4.8 simplifies safe working with self-drilling screws of up to 4.8 mm, prevents wear of the drill bit and ensures safe fittings.

Virtually dust-free workplace

Powerful wet and dry dust extractor for use in the workshop and assembly work. The FEIN dust extractors DUSTEX 25 and DUSTEX 40 are fitted with an automatic switch-on function for using power tools. Optimum operation on the construction site with soft start function and electronic suction control.
